

HCIL Assignment 1

- **Group Members:**

Swapnil Badave(33303) , Rahul Kamble(33330), Sahil Katkamwar(33331)

Good Designs (In College Campus)

Image	Reasons why it is a Good Design
<p>1. Signs on Toilets</p>  A photograph of a blue rectangular sign mounted on a white wall. The sign features a white icon of a person and a toilet, with the text "UNISEX TOILET" below it. The wall is part of a building with a red-painted section and a window in the background.	<p>There are clear signs on restrooms and toilets, like in this case where it's mentioned that this is a Unisex Toilet.</p>
<p>2. Flexible Tap</p>  A photograph of a white ceramic sink with a chrome faucet. A black flexible hose is attached to the faucet, extending over the sink. A bottle of yellow liquid soap is on the sink's edge. In the background, a red fire hose reel is visible.	<p>This tap on the ground floor of F-Building is flexible. Which means that you can adjust it according to your use case.</p>

3. Roof for Digital Notice Board Display

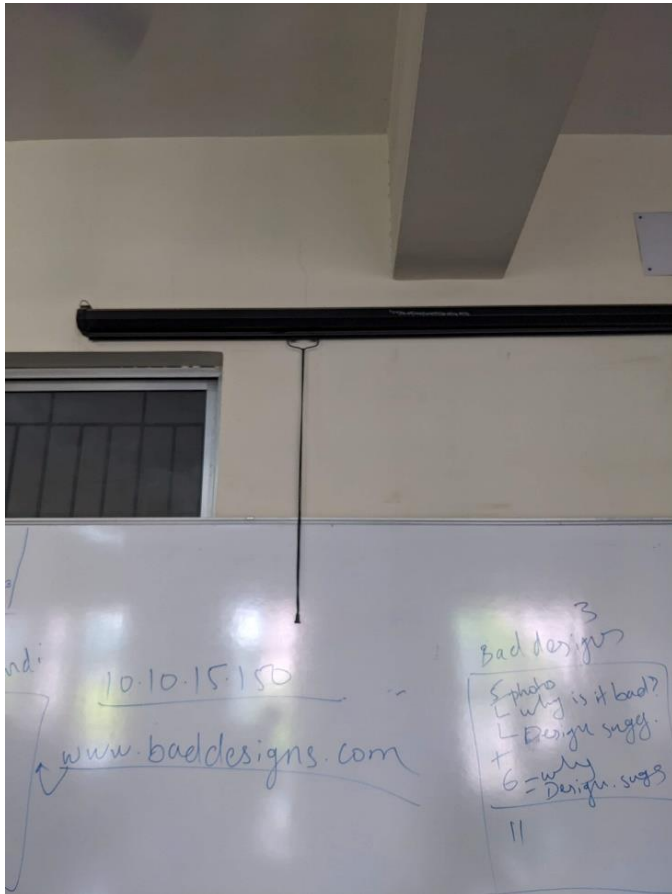

There is a roof over the digital notice display board to prevent bird droppings on it as well as protecting it from rain.

4. Floor Layout Maps

There are floor layout maps for every floor in the F-Building which provide a new person with the knowledge of all the classrooms and labs on the floor and where to find the desired classroom.

5. Roll-up Projector Screen

These roll-up projector screens have a thread attached to their handles which makes it easy to pull down the screen.

6. Marking Hot Counter Top in Canteen

In the PICT Canteen it is mentioned that the top of this counter surface might be hot, as right behind this counter tea and coffee is prepared.

Good Designs (In Own Neighborhood)

Image	Reasons why it is a Good Design
<p data-bbox="108 376 544 414">1. Indoor Cloth Hangers (Manish)</p> 	<p data-bbox="810 376 1485 533">Clothes can be hung easily indoors in rainy season. Plus, this type of indoor cloth hanger mechanism saves space as opposed to directly mounting strings on the walls to hang clothes.</p>
<p data-bbox="108 1373 644 1411">2. Compartments in Bathrooms (Manish)</p> 	<p data-bbox="810 1373 1485 1529">There is this platform-type compartment in the corner of this bathroom which provides easy access to soaps and shampoo bottles and other amenities used in bathroom.</p>

3. Door having Windows (Prathamesh)

This type of door to the balcony provides proper ventilation and allows air to flow in and out of the room.

4. Round Doorknob (Prathamesh)

This type of doorknob is better than the normal handles.

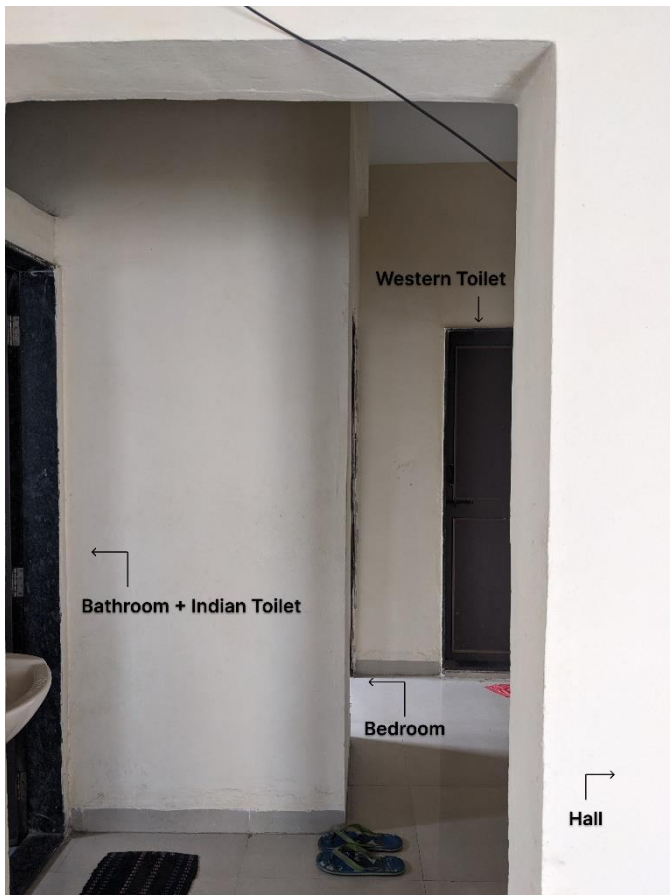

5. Five Star Chicken Ketchup Sachet (Rudra)

Five Star Chicken is a fast-food joint which serves tomato ketchup sachets like these.

These ketchup sachets have markings at the top as shown in the image to tear. If we tear it from there, the side left to the marking gets teared and it serves as the perfect sized opening for the ketchup to be poured.

6. Flat Layout (Rudra)

In my flat, both the bathrooms (Western Toilet as well as the Bathroom + Indian Toilet combined) are in this common passage between the bedroom and the hall.

This is a better architectural design as opposed to that of some flats we've seen earlier in which the western toilet was in the bedroom.

Here, the people living in the bedroom as well as the ones living in the hall can access both the toilets freely.
